## Ch. 7 Integrated Math 2B Homework for Week of April 9, 2018

7-84. At University of the Great Plains the following data about engineering majors was collected: Homework Help

|  | Engineering major | Other major | totals |
| :---: | :---: | :---: | :---: |
| Live off campus | 800 | 7200 | 8000 |
| Live on campus | 120 | 11,880 | 12,000 |
| totals | 920 | 19,080 | 20,000 |

a. What is the conditional probability of living on campus, given that you know a student is an engineering major?
b. What is the probability of living on campus?
c. Are the two events, \{living on campus\} and \{engineering major\} associated? Why?

7-91. A technology group wants to determine if bringing a laptop on a flight is associated with being on a business trip. Data for 1000 random passengers at an airport was collected and summarized in the table below. Homework Help *

|  | Laptop | No laptop |
| :--- | :---: | :---: |
| Traveling for business | 236 | 274 |
| Not traveling for business | 93 | 397 |
|  |  |  |

a. What is the probability of a passenger bringing a laptop on a flight if the passenger is traveling for business?
b. Does it appear that there is an association between bringing a laptop on a flight and traveling for business?
